

RIIWHS204E Work Safely at Heights *COST: \$220.00 pp. min 3 students*

OVERVIEW:

Delivered on behalf of Trainwest (RTO51807)

This Nationally recognised course provides you with the knowledge, theory, practical ability, to be able to work safely at heights in the workplace with minimal supervision by identifying the requirements of the job, handling, accessing, and installing the required equipment.

You will also be able to conduct a risk assessment of the job and you will understand the legislative requirements detailed in the OH&S Regulation and relevant Australian Standards, WorkCover Codes of Practice and the operation and maintenance of associated safety equipment used for working at heights.

This course can be personalised for all skill levels and consists of a face to face delivery, a theory component and practicum assessments.

MST can deliver group training at your workplace.
